8442 Dot-matrix Integrated Scale/Printer

METTLER TOLEDO

The New 8442 Series Economical, User-friendly, Reliable

● Easy Access to Printer

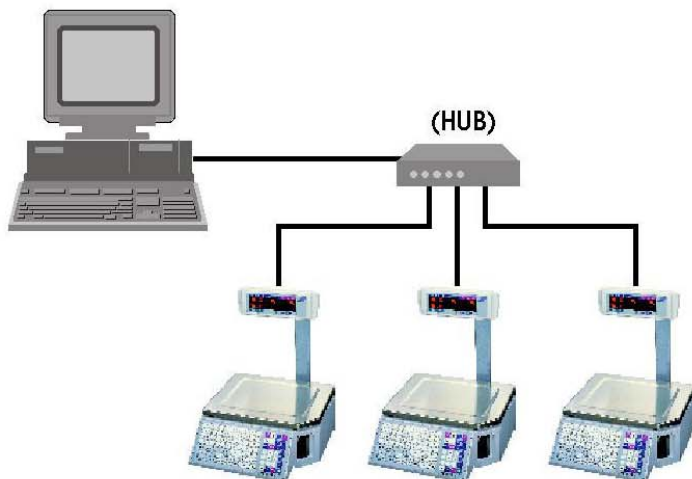

The easy "slide out" access to the printer mechanism increases efficiency and reduces downtime during the label loading process.

The 8442 is packed with performance that significantly overshadows the minimal cost of ownership. Designed for today's supermarkets, delis and other retailers, it is loaded with features which make it an ideal solution for service counters and prepack areas.

With built-in prepack functionality, the 8442 is also well-suited for distribution center applications.

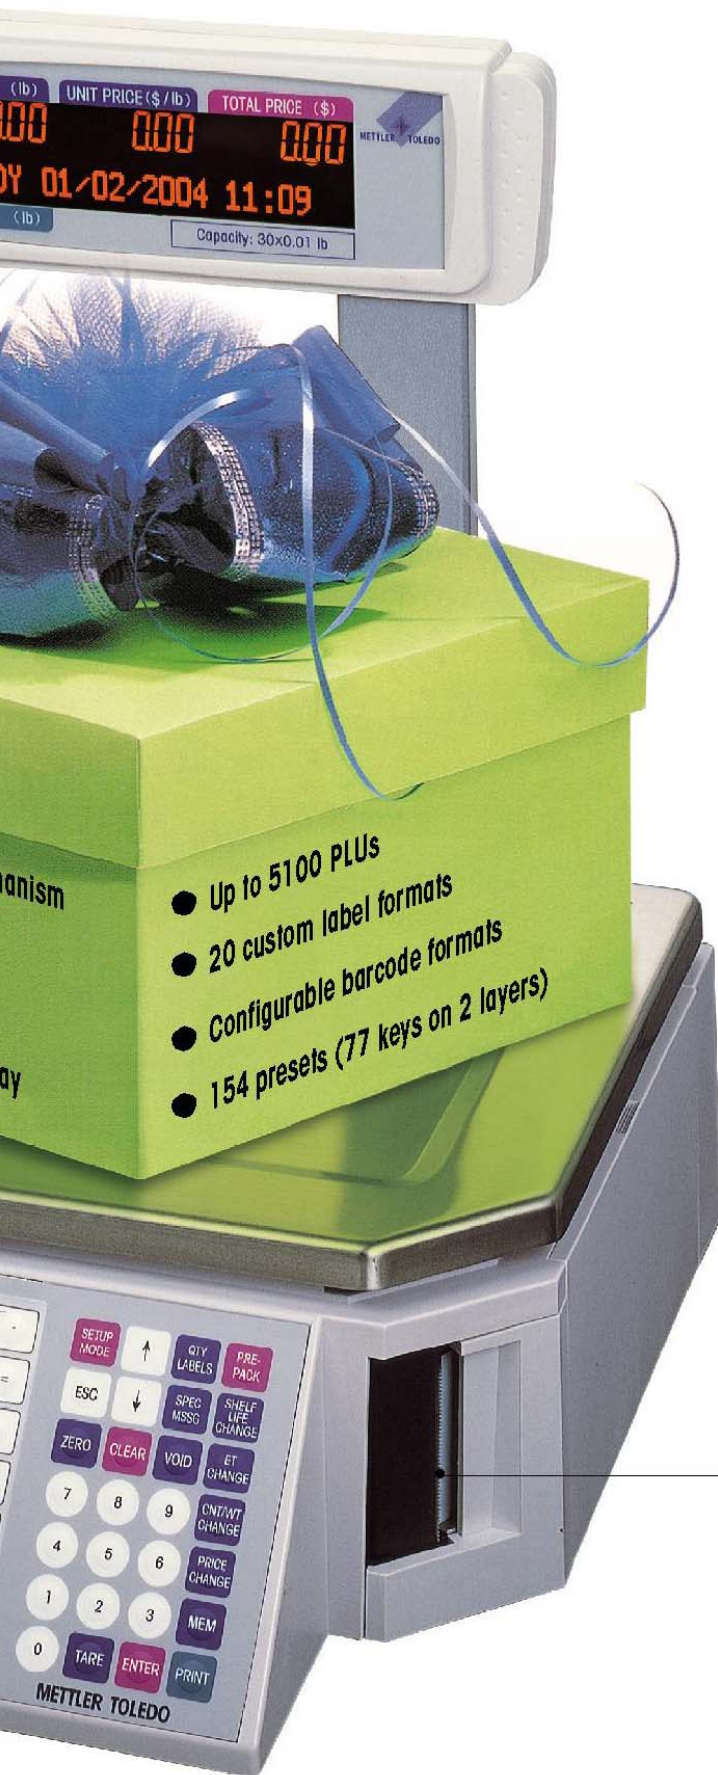

- Stainless steel printer mechanism
- Ethernet connectivity
- Prepack function
- Bright dual dot-matrix display

● Ethernet Connectivity

The new 8442 scale models are networkable within your existing TCP/IP network. Using the user-friendly PC based software, retailers can manage their fresh product data easily, improving efficiencies, and resulting in far fewer pricing errors.

● **Dual Dot-matrix LCD Display**

The bright LCD display with adjustable contrast provides clear and attractive readings for operators and customers at all times. The large dot matrix display area allows for additional marquee messages boosting sales.

● **Flexible Label Formats**

The flexible and easy to use label design software allows you to design and format your own labels easily, offering the ability to specifically market to your unique clientele.

Product Features and Specifications
